## Spring 2009 CH302 Practice Exam 3

Dear students,
For work related to organic chemistry structures and nomenclature, the following link is a useful molecule drawing tool that will tell you the preferred IUPAC name for any molecule you can think of: http://www.chemaxon.com/marvin/sketch/index.jsp

And, it is kind of fun to play with. I used it to make the figures for problems 26-28. Cheers,
Travis
